

Product overview

The shower halo plate is designed to cover any unsightly surface finishes left from an existing shower that has a larger footprint than the AKW electric showers. This saves the installer from carrying out any re-works on the wall surface to cover any visible screw holes when installing an AKW electric shower as the halo plate surrounds the shower providing a larger footprint.

Features & Benefits

- + Removes the need to re-tile/re-work the wall surface as halo plate can be screwed directly over existing holes to disguise previous shower installations, saving installer time and money
- + Offers flexibility and versatility in a variety of installations without the need to modify the product as this universal plate has pre-drilled plumbing fitting apertures for pipes and cables to be wired into the shower

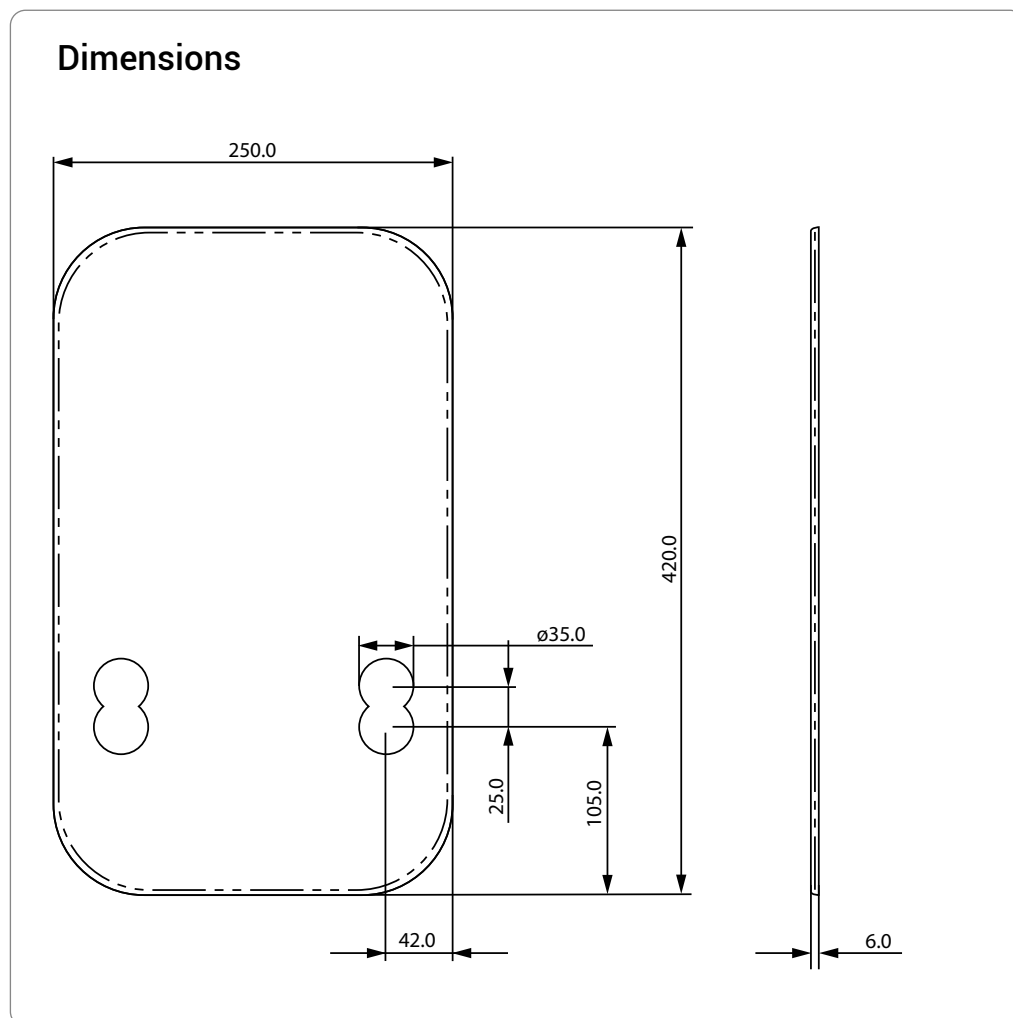

Product Specification

- + **Thickness:** 6mm
- + **Material:** GRP
- + **Finish:** White
- + **Quantity:** 1
- + **Warranty:** 5 Years
