

Product Overview

Vinyl flooring coving allows the floor covering to be continued up the wall. The cove former is installed at the base of the wall and creates a constant curve to run the floor covering up, as well as providing a hidden support for the floor covering at a weak point. The cove former is made of flexible PVC to allow for easy curving on site.

Features & Benefits

- + Allows for easy cleaning of flooring as the dirt won't get trapped in the corners
- + Provides a hidden support for the floor covering at a weak point

Product Specification:

- + Colour: black
- + Pack Quantity: 5
- + Length: 3m
- + Material: PVC
- + Suitable for: Using with Vinyl flooring to improve water retention
- + Specific weight: 1.32 kg/l.

Installation:

- + Adhesive required - see related products below
